

SDA CO2 Enquiry

Is the SDA CO2 to replace an existing **panel mount** 5001 (or to be cited in a panel pre-designed to house panel mount 5001 units)?

Yes (Use table on left)

No (Use table on right)

SDA Monitor and CO2 module, combined panel, configured for CO2 5000ppm in N2, 24V DC, Analox	SDACBBNXA
As Above with datalogging	SDACBBNYA
SDA Monitor and CO2 module, combined panel, configured for CO2 5000ppm in He, 24V DC, Analox	SDACBBHXA
As Above with datalogging	SDACBBHYA
SDA Monitor & CO2 module, combined panel, configured for CO2 0-2% in N2, 24V DC, Analox	SDACBDNXA
As Above with datalogging	SDACBDNYA

At this stage you need to determine the following to select the correct part number:

Do you require data-logging?  
Is the unit to be rack or panel mounted?  
Is the unit to be used in N2 (an air chamber) or in He (a saturation chamber)?  
Which range is required: 5000ppm or 0-2%

SDA Monitor and CO2 module, rack mount separates configured for CO2 5000ppm in N2, 24V DC, Analox	SDARBBNXA
As Above with datalogging	SDARBBNYA
SDA Monitor and CO2 module, rack mount separates configured for CO2 5000ppm in He, 24V DC, Analox	SDARBBHXA
As Above with datalogging	SDARBBHYA
SDA Monitor & CO2 module, rack mount separates configured for CO2 0-2% in N2, 24V DC, Analox	SDARBDNXA
As Above with datalogging	SDARBDNYA
SDA Monitor & CO2 module, panel mount separates configured for CO2 5000ppm in N2, 24V DC, Analox	SDAPBBNXA
As Above with datalogging	SDAPBBNYA
SDA Monitor & CO2 module, panel mount separates configured for CO2 5000ppm in He, 24V DC, Analox	SDAPBBHXA
As Above with datalogging	SDAPBBHYA
SDA Monitor & CO2 module, panel mount separates configured for CO2 0-2% in N2, 24V DC, Analox	SDAPBDNXA
As Above with datalogging	SDAPBDNYA

Optional Extras

Do you require any relays or 4-20mA output?

Yes

You require an output module Part No: SDAOMCURRENT

Will you be powering the SDA from it's standard 24VDC input?

No

You require a mains power adapter Part No: XK0-662
