Divex 2 Diver HP/LP Control Panel with Communications this comprehensive Divex Surface Control Panel provides all of the facilities necessary to monitor and control diving operations.

The panel is housed within a robust carry case incorporating HP and LP air control, depth monitoring and clear communications for up to two divers. Each diver has an independent breathing air supply in accordance with the Association of Diving Contractors Guidance Note ADC 5/95.

Two high pressure air inlets per diver (4 HP inlets in total) provide the primary air supply which is reduced by a 350 Bar high flow regulator.

One low pressure inlet is fitted providing either diver with a back up supply either through a pre-regulated HP supply or directly from a low pressure compressor. An electronic audio/visual alarm is fitted alerting the surface tender when the online HP air supply reaches a preset limit (below 50 Bar).

Each divers depth is monitored via 6" diameter, 0-70 metre, 0-25% accurate gauges, which are housed in the lid allowing upright positioning. The lid section also houses the communications system which is based on the Divex 2 Diver Phone model D8802 and includes a professional tape recorder.

Diver 2 HP/LP Control Panel With Communication

Specification

| | |
|-------------------------|---|
| HP Inlets | 4 (2 per diver) |
| HP Regulator | 2 (1 per diver) 350 Bar inlet 0-30 Bar outlet |
| HP Supply Gauges | 63mm diameter 0-6000 PSI |
| LP Inlets | 1 |
| LP Supply Gauges | 63mm diameter 0-370 PSI |
| HP Inline Filter | 40-55 micron |
| Pneumo Gauges | 6" diameter 0-70Mt/230Ft 1/4% accurate |
| HP Supply Connection | 1/4" BSP Male |
| LP Supply Connection | 3/8" BSP Male |
| Diver Supply Connection | 3/8" BSP Male or JIC 6 |
| Pneumo Connection | 1/4" BSP Male or JIC 4 |

Dimensions

| | |
|---------------|-------|
| Length | 28" |
| Width | 23" |
| Height | 14" |
| Approx Weight | 43kgs |
