The ATA Pro is the only true trimix analyser available on the market. The ATA Pro displays accurate readings of helium, oxygen and balance gas allowing you to accurately plan for your trimix dive. As well as providing diver safety, using the ATA Pro will help to save you money as you no longer have to dump expensive tank fills.

The ATA Pro offers a greater level of precision with the helium sensor being fully compensated for the presence of oxygen.

Fitted with a unique helium sensor zero function, the ATA Pro provides users with a greater level of accuracy throughout the analysers life.
