**The Divex Shadow Buoyancy Jacket is designed for use with front and back mounted rebreathers enabling buoyancy adjustment both above and below the surface of the water.**

The Shadow Buoyancy Jacket has been specifically tailored to interface with field equipment worn by a combat swimmer providing a clear back area for the carriage of field packs.

The design incorporates a single or optional double inflation cylinder, oral inflation device, overpressure relief valve, integrated weight pocket system with quick-release and a small back pack for the carriage of ancillary equipment.

### Features

- Integrated 0.4 ltr or 1.0 ltr inflation Cylinder
- Oral inflate/deflate assembly
- Quick release buckles
- 2 drain valves
- Relief valve
- AEODP-7 (formerly Nato STANAG 2897 Class A)
- Black or DPM
- Other jacket colours available on request.
- Low Pressure and Direct Feed (High Pressure) inflation systems available.
