

## 101D2 & G21-2 Product Obsolescence Notice

**Product:** 101D2 and G21-2

**Obsolescence Date:** September 30th, 2021

**Reason for Obsolescence:** Due to advancements in technology and the introduction of new, more efficient models, the 101D2 product line will be discontinued. This decision has been made to streamline our product offerings and focus on enhancing our latest technologies.

**Replacement Product:** Although we don't have a direct replacement for the 101D2/G21-2 we do have offer models in our portfolio which cover most applications. Please feel free to contact Analox and we can discuss.

**Support and Service:** Due to the 101D2/G21-2 not having a direct replacement we will be continuing to offer the 9100-9212-4 O2 sensor on a best-endeavours basis, depending on availability from our supplier. If a supply issue does arise the O2 sensor will be made obsolete.

We will not be offering a service and repair option for these models due to this ceasing on the 29th of September 2023.

We appreciate your understanding and continued support. For further information or assistance with transitioning to the new models, please feel free to contact Analox.

**For your records:**

**101D2 and G21-2 part numbers no longer available for purchase post 30/09/2021:**
