Divex 2 Diver & Standby Air/Mixed Gas Panel this Divex panel supports two air/mixed gas divers and a standby diver on a totally separate gas supply and distribution circuit.

The very high flow HP regulators ensure adequate gas flows at the maximum operating depth of the panel. Depth monitoring is via three 6" diameter 0-100 msw/350fsw 0-25% accurate depth gauges.

Relief valves, control valves and pipework have all been selected for high flow capability, mixed gas and environmental compatibility. An emergency cross-over facility allows the standby supply and main diver supplies to be connected in the event of HP regulator failure or need to switch to an alternative gas supply.

Specification

Gauges	Pneumo 6" 0-140msw/460fsw Foundrometers 2 1/2" HP + LP supply
Regulators	2 High Flow (CV - 2)
Pipework	Tungum Tube
Main Valves	1/2" Ball
Pneumo Valves	1/4" Needle
Fittings	Brass Triple-Lok
LP Supply Conn	JIC8
HP Supply Conn	JIC6
Diver Conn	JIC8
Pneumo Conn	JIC4
