IMCA Design Audit

# Remote Audit Solution

## INTRODUCTION

Due to COVID-19 restrictions our clients are finding it increasingly difficult to manage and co-ordinate the necessary Dive System Auditing requirements of their assets to enable them to be utilised for work, whilst also adhering to local, international and company guidelines on Global Travel.

JFD have recognised this problem and developed an innovative solution to support our clients through this difficult situation, by now offering a Remote IMCA Design Audit service. This solution enables clients to have their assets audited in accordance with IMCA guidelines, without the need for travel and 3rd party site access. The unique process has been used by JFD Auditors and Dive Technical Advisors in the past, but refined to cover the COVID emergency.

Through connecting our clients experienced Dive Tech with the auditor and a refined process of remote sharing of photos, videos and certs on a cloud based platform JFD are able to provide a high standard of Audit that will enable our clients to be operational during this time.

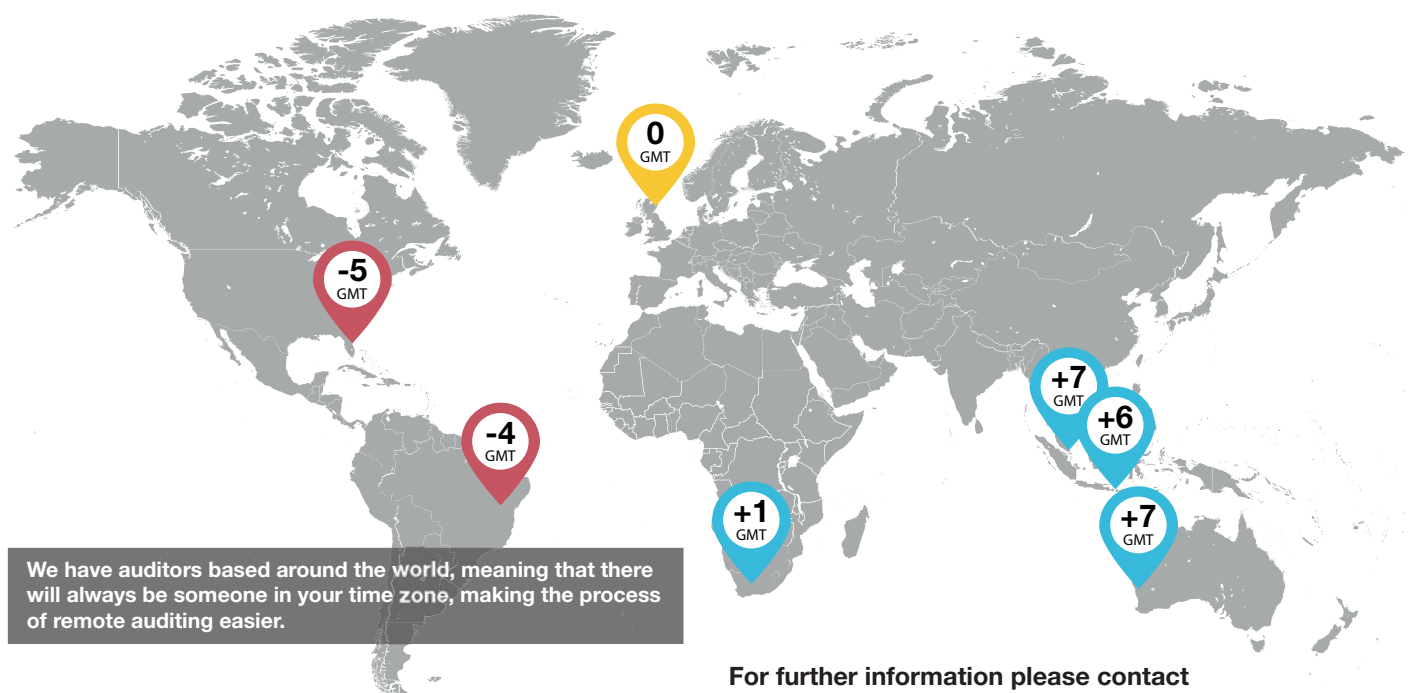

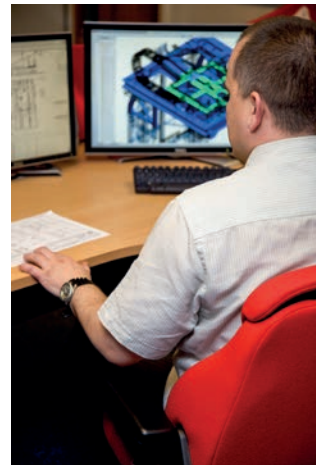

To support the process JFD are able to offer auditors situated globally, in the below time zones, allowing for efficient communication and cost effective travel (if applicable).

Should you wish to conduct a traditional onsite Audit, JFD are able to support globally through our base of auditors located globally.

## WHAT CAN WE OFFER REMOTELY?

To combat COVID-19 Travel Restrictions, JFD are able to support our clients and offer the below solutions remotely.

- **IMCA R006**
- **IMCA D023**
- **IMCA D024**
- **IMCA D037**
- **IMCA D040**
- **IMCA D053**
- **Assurance Audits**
- **PMS Review & Support**

We have auditors based around the world, meaning that there will always be someone in your time zone, making the process of remote auditing easier.
