Indestructible

The driving gear is suitable for short running as well as continuous operation. The 4 stage construction and the heavy duty industrial roller bearings guarantee maximum lifetime for all professional applications. The first stage and the high pressure final stage are equipped with high-tech polymer piston rings, which proved their outstanding wear and tear properties in several endurance tests in an independent Quality Inspection Centre. The maintenance-free low pressure oil pump guarantees reliable lubrication.

Resistant

A newly developed, supra-light aluminium chassis guarantees the best protection against corrosion! Interstage and afterstage coolers made of stainless steel resist the toughest climatical conditions. The vibration reducing construction of the motor rocker stands for smooth compressor operation as well as self-tensioning of the v-belt.

Economic

A filter cartridge of the SUPER-TRIPLEX P31 fills up to 230 diving cylinders*. Optional for MARINER: P41 filter system for up to 530 diving cylinder fillings*.

* 10 liter diving cylinder at 20°C ambient temperature and 200 bar

Optional

¹ Only in combination with filter system P41, not on units with combustion engine

Accessories From A To Z

Automatic Condensate Drain* for efficient and safe drainage
B-TIMER allows the comfortable monitoring of filter exchange and maintenance intervals
Compressor Control** for auto switch-off when final pressure is reached or oil pressure drops down
Crush Frame protects the unit and is required for mounting accessories on the CAPITANO 140
P41 Filter System higher filter capacity for units with continuous operation
Securus *** supervision of breathing air quality and maximum exploitation of the cartridge capacity
Telescopic Intake Tube**** for air intake of units with combustion engine
Trolley for easy transportation of the unit

* only available together with compressor control

** in 3-phase version only available together with automatic condensate drain

*** only available together with filter system P41 and electrical control

**** standard scope of supply with intake hose, only on units with combustion engine
